A single gargle of salt, vinegar, pepper and water, in proportions to make a pleasant combination, will cure a common soreness of throat.

only \$2.75 PER COPY.

**The send for circulars and see our terms, and a full description of the work. Address JONES BROTH-

The Commissioner of Agriculture will take ground before Congress this winter against the renewal of the reciprocity treaty, in so far as it provided for the admission free of duty of productions of the soil, for the reason that it is unjust the core formers.

An exchange says the following pre-scription will cure the most obstinate cases of hoarseness in a short time. Colds cases of hoarseness in a short time. Cods are unusually prevalent just now, and this remedy is so simple that it can do no harm, certainly, to try it: Take the whites of two eggs, and beat them with two spoonfuls of white su-gar, and grate in a little nutmeg; then take a plut of lukewarm water. Repeat

the prescription if necessary.

The following is going the rounds of the papers: One of the most aunoying and painful little troubles is a felon. A genuine remedy is worth circulating. It is said that a poultice of onions, applied morning and night for three or four days will cure a felou. No matter how bad the case, lancing the finger will be unnecessary if the poultice is applied. The remedy is a sure, safe and speedy one.

THE PRACTICAL FARMER.

PUBLISHED IN PHILADELIPHIA, Monthly at \$1.50 per annum, is advence, by Paschail Morris, is No. 12th st., Philadeliphia, 20 copies for \$20. It shelfy made up of original uniter, in relation to every department of Agriculture, Horticulture and liberal premiums offered to agents and canvaseers. Sample copies furnished on application.

AGENTS WANTED FOR

CURE FOR HOG CHOLERA.—A writer in the Monthly Report of the Department of Agriculture gives a very simple remedy for hog cholera, which, he says, has never falled as a preventive, and in every listance wherein from neglect the disease made its appearance, he succeeded in curing it in a few days: Two or more large barrels are procurred and placed conveniently to the kitchen. Into these deposits all the pot-liquor, dishwater, and greasy water of any kind, refuse pieces of bacon, and a few bucketfuls of soap-suds; let it stand a few days, or until fermentation begins, then add to each barrel one bushel of fine charcoal, a half-bushel of corn-meal, one handful of sait, and a half pound of copperas; let it stand a short time, so that the coal may become thoroughly saturated with the liquid, then pour it into troughs made for the purpose. One barrel thus prepared, he says, if given once or twice a week, will be sufficient for fifty hogs, and prevent cholera, and keep them in a healthy condition.

THEBUUE COATS, and bied by the liquid as a prevent were simple remedy for hog deficient for fifty hogs, and prevent cholera, and keep them in a healthy condition.

THEBUUE COATS, and bied by the liquid as a prevent which a says, in the contains over 100 fine Engravings and 200 pages, and is the step let in the dotted to the liquid. The pound of copperas; let it stand a few days, or until fermentation begins, then add to each barrel of the purpose. One barrel thus prepared, he says, if given once or twice a week, will be sufficient for fifty hogs, and prevent cholera, and keep them in a healthy condition. CURE FOR HOG CHOLERA.-A writer

CORN HUSKS.—It has been discovered in Austria that sixty per cent. of the weight of corn husks are of value in the arts. They obtain from every one hundred pounds of husks, twenty pounds of excellent varieties of paper, twenty-five pounds of excellent long fibre, suitable for spinning and weaving into a cloth of great strength and capacity for resisting all tendency to decomposition, and fifteen pounds farinaceous substance which by itself, or added to wheat flour, makes an excellent bread, that will keep sweet and good for months, and is thus well adapted to supply the place of hard tack in armies and at sea.

Husks are now worth \$70 per ton in St. Louis, for the manufacture of mattresses. To prepare them for market it only needs to split them once or twice, and bale them.

Suppose our farmers jerked their corn from the stock, husks and all (they could do it much more quickly then they could husk it, and would thus avoid bad weather) then, having it safely housed, they could employ their entire force under cover, during the stormy days of winter, in husking their corn, and at the same time utilizing their husks—a most important portion hitherto almost wholly wasted.

wholly wasted.

CORN AND PORK.—From carefully conducted experiments by different persons, it has been ascertained that one bushel of corn will make a little over 10½ pounds of pork, gross. Taking this result as a basis, the following deductions are made, which all farmers would do well to lay by for a convenient reference—thus:

When corn sells for 12½ cents per bushel, pork costs 1½ cents per pound. CORN AND PORK .- From carefully

When corn sens for 125 cents per pound.

When corn costs 17 cents per bushel, pork costs 2 cents per pound.

When corn costs 25 cents per bushel, pork costs 3 cents per pound.

When corn costs 33 cents per bushel,

pork costs 4 cents per pound.
When corn costs 45 cents per bushel,

ork costs 5 cents per pound.

The following statement shows what the furmer realizes in corn, when sold in the form of pork:

When pork sells for 3 cents per pound, When pork sens per bushel in corn.
When pork sells for 4 cents per pound
it brings 33 cents per bushel in corn.
When pork sells for 5 cents per pound
it brings 45 cents per bushel in corn.

CURRANTS AND GOOSEBERRIES. CURBANTS AND GOOSEBERRIES.

The New England Homestead says it is to be presumed that not one in a hundred understands the simple process of cultivating either currants or gooseberries, although it has been detailed in the horticultural books in which the world abounds. Thousands of persons, with every appliance for success, are still content to live along without a plentiful supply of these delicious, healthy and cheap luxuries, merely because they have not thought of the matter. They have a few stinted bushes set in the grass with three-fourths of the stalks dead, and then wonder why they do not bear in abundance.

abundance.

There is not a more beautiful shrub There is not a more beautiful shrub
growing than the currant, properly propagated; and the same may be said of the
gooseberry. Cultivators who pay any
attention to the subject, never allow the
root to make but one stalk; or, as the
English say, "make them stand on one
leg," thus forming a beautiful minature
tree.

Homey, Glycerine, Elder Flower,
Boquet and Palm,
In quality, style and perfume warranted equal to
the English and soid fully 30 per cent. cheaper,
which accounts for the great falling off in the demand for the foreign seaps, and the unprecedented
scaps, now soid everywhere in the United States.

McKrosz, Van Halona & Co., sole manfrs,
Philadelphia and New York.

leg," thus forming a beautiful minature tree.

To do this you must take the sprouts of last year's growth, and cut out all the eyes or buds in the wood, leaving only two or three at the top; then push them about half the length of the cutting into meliow ground where they will root and run up to a single stalk, forming a beautiful symmetrical head. If you wish it higher, cut the eyes out again the second year. We have one six feet high. This places your fruit out of the way of heas, and prevents the gooseberry from This places your fruit out of the way of hens, and prevents the gooseberry from mildewing, which often happens when the truit lies on or near the ground, and is shaded by a superabundance of leaves and sprouts. It changes an unsightly bush, that cumbers and disfigures your garden, into an ornamental dwarf tree. The fruit is larger and ripens better, and will last on the bushes, by growing in perfection, until late in the fall.

The mass of people suppose the roots make out from the lower buds. It is not so; they start from between the bark and wood, at the place where it was cut from the parent root.

"Boy, did you let off that gun!" ex-claimed an enranged schoolmaster. "Yos, master." "Well, what do you think I will do to you?" "Why, let me off." "Address T. William & Co., Book Publishers, Full

The articles upon public questions which appear
in Harper's Weekly from week to week form a remarkable series of brief political cessays. They are
distinguished by clear and pointed statements, by
good common sense, by independence and breadth
of view. They are the expression of mature conviction, high principle, and strong feeling, and take
their place among the best newspaper writing of the
time.—North American Review, Boston, Mass.

SUBSCRIPTIONS-1869.

"Unquestionably the best Sustained work of the kind in the World." HARPER'S

NEW MONTHLY MAGAZINE. Critical Notices of the Press.
t popular monthly in the world.—Net The most popular monthly in the world.—New Fork Observer.

We must refer in terms of eulogy to the high tone and varied excellences of Harper's Magazine—a journal with a monthly circulation of about 170,000 copies—in whose pages are to be found some of the choicest light and general reading of the day. We speak of this work as an evidence of the culture of the American people; and the popularity it has acquired is merited. Each number contains fully 144 pages of reading matter, sproprietely illustrated with good wood-culs; and it combines in itself the racy monthly and the more philosophical quarterly, blended with the best features of the daily journal. It has great power in a dissemination of a love of pure literature.—Thurnen's Guide to American Literature, Lendon.

We can account for its success only by the simple fact that it meets precisely the popular taste, furnishing a variety of pleasing and instructive reading for all.—Zion's Herald, Boston.

SUBSCRITIONS-1869.

[III.-3071]

Scrofula or King's Evil is a constitutional disease, a corruption of the blood, by which this fluid becomes witisted, weak, and poor. Being in the circulation, is pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The servicious taint to variously caused by messurful disease, low living, disordered or unhealthy food, impure air, fifth and filthy habits, the depressing vices, and, above all, by the veners at infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the

their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the fings, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depreses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have for less power to withstand the attacks of other diseases; consequently, vast numbers prinh by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this larking infection, and their health is undermined by it. To cleause it from the system we must resovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla, Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the resence of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eureriva and Skin Disnasks, Sr. Anthony's Fine, Ross, or Envirences, Pimples, Postules, Bloyches, Blayss and Bolls, Temons, Terran and Salt Ringers, Scale Head, Reguently, and, indeed, all Complaints and Merickial Dispasse, Dropsy, Dyspersia, Dedility, and, indeed, all Complaints and story of the blood. The popular belief in "impurity of the blood." is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills, FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

FOR ALL THE PURPOSES OF A FAMILY PHYSIO, are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties carrel, and cleanse, and invigorate every portion of the human organism, correcting its desired action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is howed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only de they cure the every-day complaints of every body, but also many formidable and dangerous discuses. The agent below named is pleased to furnish gratis my American Almanae, containing certificates of thoir cures and directions for their use in the following complaints: Continuous, Heauthern, Heauthern sing from discurdered Nomach, Nameus, Indigestion, Pain in and Morbied Phaction of the Borets, Euclidency, Loss of Apparitie, Janualice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

Coughs, Colds, Influenza, Hoursences, Croup, Browchitis, Incipient Consumption, and for the relief of Consumptive Putients in advanced stages of the

Patients in advanced stages of the disease.
So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every acction of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. White many inferior remedies thrust upon the ammunity have failed and been discarded, this fift gained friends by every trial, conferred benefits on the afflicted they can never forget, and pro-

on the afflicted they can never forget, and pro-duced cures too numerous and too remarkable to be forgotten.

ST. JOSEPH, MO.

The Church Union. THIS paper has been recently enlarged to mamning paper has been recently enlarged to mamning paper in the world. It is the leading organ of the Union Movement, and opposer situalism, close communion, exclusiveness and church caste. It is the only paper that publishes flarary Wann Ranchara as sermions, which it does every week, just as they are delivered—without qualification or correction by him. It advocates universal suffrage; a union of christians at the polist and the rights of labor. It has the best Agricultural Expariment of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its relitorial management is impersonal; its writers and editors are from every branch of the charch, and from every grade of society. It has been apply termed the freest organ of thought in the world.

Such a paper, ofering premiums of Sewing Machines, Dictionaries, Appletim's Cyclopedia, Planos, Organs for churches, etc., universe one of the best papers for canvassers in the world.

Every congregation may obtain a communion service, an Organ, a Medodon, a lible, or a Life Insurance Fulley for its Paster, as almost any other mechanical program of the paster, as almost any other mechanical program in the control of the paster, as almost any other mechanical program of the paster, as almost any other mechanical program of the paster, as almost any other mechanical program of the paster, as almost any other mechanical program of the paster, as almost any other mechanical program of the paster, as almost any other mechanical program of the paster, as almost any other mechanical program of the paster, as almost any other mechanical paster in the paster of the paster.
